

AWWA PVC Standard update

To Whom It May Concern,

The AWWA PVC pressure pipe standard has been revised with an effective date of August 1st, 2016. The C900-16 revision has consolidated all diameters 4 through 60 inch into a single standard and resulted in the discontinuation of the AWWA C905-10 Standard which had covered sizes from 14 inch and above

Diamond Plastics is proud to be a leader in the PVC pipe industry. We were the first to produce 48" solid wall PVC pipe in America and the first to produce 54" and 60" solid wall PVC pipe in the world. For answers to your questions about any of our PVC pipe products feel free to contact your area representative or the corporate office.

Sincerely,

DIAMOND PLASTICS CORPORATION
